ABSTRACT:

Business E-Commerce Growing give flexible to all those who want to wrestle with global business. Internet networks not only displays information only but has expanded even further into sales and online transactions. System which is easy on a site will attract the attention of web visitors to visit or even conduct transactions online. Leuser shop is a shop that provides the tools - tools for the purposes of outdoor activities. Like, hiking, diving, caving, climbing, and snorkeling. The main reason is to assist in the writing of the Leuser Stores in an effort to expand its market share. Therefore the writer create a website based E-Commerce in the Leuser Stores. While the research methods used in this paper is through library or field research. On this website categorized products based on needs such as Carrier, Handbags, Shoes, Sandals, Jackets and more. Users can also view details of that product. Then put it into the shopping cart. After that users can fill the order confirmation form to process shipments. Besides this website there are guest books, forums, news, polls, gallery and information on the mountain - a mountain in Indonesia, all of which can be updated periodically in the database.
