ABSTRACT:
At the age of more than 10 years marriage very vulnerable to an affair that caused decline in marital satisfaction of couples marriage around 10 age and a dozen years, perhaps in accordance with marital problems can arise at the age of marriage for more than 10 years because its a long time and long, the couple already know the good and bad behavior or behavior that is owned by spouses and habits, because it is not unusual for couples stuck in a routine and boring life. Moreover generally, women (wives) tend to conduct an affair with the emotional reasons and jealousy because more women will respond to any indications of emotional commitment among partners with others. Women who are involved in the affair are looking for a relationship that gives them emotional intimacy. Deficiencies found in self-life couples that make a woman decides to get what no other man gained in this research aims to reveal the affair is done by women who have been married more than 10 years, contributing factor and the description of the components in love with a woman who married more than 10 years. This research was conducted by case study, which in this study using the interview method is very general and systematic method of observation. This research subject is a woman who had been married for more than 10 years, conducting an affair for at least one last year. Based on the research that we can know that the subject had an affair during the first last year with fitness friends, the reason for having an affair subject to retaliation, and feeling lonely, the component of love with my husband changed the subject.
